Bible Verse

Verse of the Day

So, my dear brothers and sisters, be strong and immovable. Always work enthusiastically for the Lord, for you know that nothing you do for the Lord is ever useless.

Three Central Words

When you first learned to speak, you learned three central words: Please and thank you. We often forget what the simplest first lesson that we learned as children means in our hearts to God. When we ask God for something, the attitude must be please, not demanding that we have to have something, or complaining that we didn't get something. But God, if you please, if it's Your will, then I praise You. Then there is thank you. When you receive something from God, you don't just walk away and take it for granted, or say, "I had the faith, so God had to do it". Thank God for everything every day! Everything you have in your life is a gift, not an entitlement. The more you thank Him, the more gifts and blessings you'll see in your life. Remember that one of the first lessons of life and in the Lord is one of the most important spiritual lessons for joy and blessing. Put it into practice. "I'm not demanding it, I'm just asking you." Put it into effect today, won't you please... and thank you.

The Four Chaplains

The Four Chaplains, also referred to as the Immortal Chaplains or the Dorchester Chaplains, were four chaplains who died rescuing civilian and military personnel as the American troop ship SS Dorchester sank on February 3, 1943, in what has been referred to as the one of the worst sea disasters of World War II.

Columbia Disaster

Columbia re-entered the earth's atmosphere on the morning of February 1, 2003.

It wasn't until 10 minutes later, at 8:53 a.m.—as the shuttle was 231,000 feet above the California coastline traveling at 23 times the speed of sound—that the first indications of trouble began. Because the heat-resistant tiles covering the left wing's leading edge had been damaged or were missing, wind and heat entered the wing, damaging hydraulic systems and sending the shuttle into an unrecoverable spin, causing it to break apart.

Ground observers noticed the shuttle shedding debris as it passed over California, with the first recovered pieces hitting the ground in West Texas near Lubbock at 8:58 a.m. One minute later, the last communication from the crew of five men and two women was heard, and at 9 a.m. the shuttle

disintegrated over northeast Texas, near Dallas.

Residents in the area heard a loud boom and saw streaks of smoke in the sky. Debris and the remains of the crew were found in more than 2,000 locations across East Texas, Arkansas and Louisiana. Making the tragedy even worse, two pilots aboard a search helicopter were killed in a crash while looking for debris.

Strangely, worms the crew had used in a study and which were stored in a canister aboard the Columbia did survive.
