USS Indianapolis (CA-35)

USS Indianapolis (CA-35) was a Portland-class heavy cruiser of the United States Navy, named for the city of Indianapolis, Indiana. Launched in 1931, the vessel served as a flagship for the Commander of Scouting Force 1 for 8 years, then a flagship for Admiral Raymond Spruance in 1943 and 1944 while he commanded the Fifth Fleet in battles across the central pacific during WWII.

Captain McVay took command of the USS Indianapolis in November of 1944. He led the ship the invasion of Iwo Jima,

then the bombardment Okinawa in the spring of 1945. But in July 1945, Indianapolis completed a top-secret trip to deliver parts of 'Little Boy'. The first nuclear weapon ever used in combat, to the United States Army Air Force Base on the Island of Tinian. On the way back to the Philippines, on July 30, 1945 at 0015 (1:30) The Indianapolis was sank by 2 Japanese torpedoes. It went down in 12 minutes. Of 1,195 crewmen aboard the ship, there were only 317, which survived. As of today, there are only 8 survivors still living.
